

Our Capabilities

Driven by Quality. United by People. Sustained by Performance.

Quality Construction & Production is a torchbearer in onshore and offshore fabrication, maintenance and construction offering highly skilled personnel and superior services to the domestic and international oil and gas industry.

Quality Production Management provides its clients with premier operations management services. This includes contract operations services incorporating offshore production and plant/pipeline operations, managed properties, logistics coordination and platform maintenance.

Traco Production Services is an ASME coded supplier of quality vessel fabrication and production services, offering new or refurbished production equipment, separators, pressure vessels, safety system panels and more to the upstream, midstream and downstream sectors.

Zadok Technologies is an international leader in electrical and instrumentation, testing, inspection and telecommunication services to the global energy industry.

Quality Companies is a consortium of premier oil and gas product and service companies strategically located throughout the Gulf Coast region and beyond. Four industry-leading companies make up the Quality Companies family.

With established facilities in Youngsville and Houma, Louisiana; Corpus Christi and Houston, Texas; and Belmont, Ohio, Quality Companies has a broadening presence across the United States.

Quality has recently launched an Industrial/International division that will concentrate on diversifying the company from the Gulf of Mexico and oil and gas industry and focus on alternative energy projects within the United States and abroad. The new division will focus on ongoing operations and projects in the Caribbean, Africa, Mexico and South America.

4 Companies, 1 Team... Quality In All We Do.
