

# Our Services

## Quality..Is In All We Do.

**TRACO Production Services** (TRACO) is a supplier of quality vessel fabrication and production services, offering new or refurbished production equipment, separators, pressure vessels, safety system panels and more to the upstream, midstream and downstream sectors. The TRACO business joined the Quality Companies family in 2011. Offering critical oil and gas production components to the industry, TRACO also provides professional installation and repair for most products sold.

Committed to oil and gas service, TRACO has the ability to provide valve repair and maintenance to pieces of equipment. Additionally, TRACO provides ASME Code vessel fabrication and repair, as well as glycol unit cleaning and servicing.

Continuously expanding and growing in the Youngsville, Louisiana, area and beyond to the entire Gulf Coast region, TRACO Production Services strongly believes in the importance of diversification in the oil and gas industry.

## TRACO Production Services

As a leader in pressure vessel fabrication services (ASME Code and Non-Code), TRACO Production Services is currently producing approximately 60 ASME Code vessels per quarter. Current capacity on pressure vessels includes 20 tons, 10' diameter, 3" wall thickness and 5,000 psi.

Whether your company needs are valve repairs, equipment maintenance, equipment fabrication (ASME Code and Non-Code), production operators or other matters, TRACO has the extensive knowledge and production personnel to satisfy your needs. TRACO Production Services will get the job done and with quality at the forefront. Quality service and quality production is what we provide to the oil and gas industry.

### Offering Quality and Expertise in:

Vessel Fabrication
Production Separator Packages
Dehydration Units/Contact Tower
Line Heaters
Heater Treaters
B-TEX Eliminators
Pipeline Pig Launcher/Receivers
Production Manifolds
Natural Gas Flare Systems
Coalescer Separators
Pneumatic/Electrical
Safety System Hookups
Testing & Inspection Services
Hook-ups/Roustabouts
Facilities Maintenance/Upgrades
Pressure Testing
Chemical Injection
Glycol Unit Cleaning
Safety System Fabrication - ESDs & Valve Panels
New & Refurbished Production Equipment
Commissioning of Production Packages
Field Service/Troubleshooting Technicians

### I&E Services

Safety System & PSV Testing
Troubleshooting, Field Technical Support, Repairs, Design, Installs, etc
Pneumatic & Electrical Panels
Glycol Reboiler Cleaning
Hydro Testing with 10K Land Based Pump on Trailer
Troubleshoot Production Equipment

### Automation

SCADA Systems
PLC & HMI Programming
Communication Systems-Modbus, Ethernet, Fiber, etc
Design, Troubleshooting, Repairs, Field Technical Support
Control Systems - Safety Control, Process Control, Metering Control
Maintenance Techs
