

# Our Services

## Quality...Is In All We Do.

**Zadok Technologies**, a Quality Company, is an international leader in instrumentation and electrical, testing and inspection, fabrication and telecommunication services to the global energy industry.

Specializing in offshore vessels, drill ships, semi-sub, production platforms, land rigs, refineries and industrial power systems, Zadok Technologies provides clients with 24/7 emergency response, in-house engineering, quick response manufacturing and ready-to-deploy rope access certified technicians.

Zadok is fully committed to minimizing inefficiencies, maximizing output and executing smooth transitions between projects, by implementing and enforcing ongoing training in quality and safety.

### Quality Training

- NEC 505
- COMPEX (including IS)
- Fiber Optics
- Bosiet/HUET
- TWIC
- Fall Protection
- First Aid/CPR/BBP
- Rope Access (IRATA/SPRAT)

With strategic locations throughout the international energy hubs, Zadok can ensure seamless engineering, design, installation, service and maintenance support for the lifecycle of the project, anywhere in the world.

## Zadok Technologies - Providing Engineering and Field Services to the World

### I&E - Facilities

Construction of Ground Grids, Cable Tray, Conduit, Cabling, etc.
Maintenance of I&E Systems
Commissioning for I&E Systems
Calibration & Testing of I&E Systems
Control System Design
System Integration
Manufacturing and Installation of I&E Panels
Fiber and Telecoms Install
Electrical Equipment Installation
Lighting Packages

### I&E - Offshore

High and Medium Voltage Terminations and Testing
Low Voltage Wiring
Controls Wiring and Point to Point Testing
Modular Building and Remote Building Install
Standalone MCC's/Switchgear Install and Upgrades
Control Panel, DCS, PLC and UPS Install and Startup
Automation and Integration for Hazardous Environments
Transformer Install and Refurbishment
Fiber and Telecoms Install
Electrical Equipment Installation
ABS & USCG Inspections and Compliance
MPD Installs
FPSO Electrical & Instrumentation Techs for BSEE Testing

### Inspection & Testing

Low & Medium Voltage Testing
Testing to NETA Standards
On-site Breaker Maintenance
Breaker Retrofits
Comp-ex Certified Technicians
VFD Maintenance
Switchgear Maintenance
Torque and Tighten
NDE Inspections
I/O Panel Inspection and Point-to-Point Testing
Motor Testing
Ground Short Circuit Inspections
Thermal Imaging

### Telecommunication

Fiber Testing and Reporting
Install, Terminate, Test
Commscope Certified Technicians
Corning Certified Technicians
Fieldbus Network Integrity Testing
Electrical System Integrity Inspections
Power Quality Testing and Studies
Access Control
Cameras
Lighting Power Studies
